DETAILED ACTION

Drawings

1. The drawings are acceptable to the examiner.

Allowable Subject Matter

2. Claims **1-12** are allowed.
3. The following is an examiner's statement of reasons for allowance: the prior art fails to disclose...a signal-processing apparatus for controlling the black level of a digitized luminance signal included in a picture signal, comprising: a memory storing data for adjusting the black level of the luminance signal, and outputting said data according to a value of the digitized luminance signal; a black area detection circuit detecting an amount of black area in the digitized luminance signal and generating a weighting signal; a first multiplier multiplying the data output from the memory by the weighting signal to obtain a product; and a second multiplier multiplying the digitized luminance signal by a value responsive to said product, thereby adjusting the black level of the digitized luminance signal, as in claim 1; and, a method of controlling the black level of a digitized luminance signal included in a picture signal, comprising the steps of: (a) storing data for adjusting the black level of the luminance signal in a memory; (b) outputting said data according to a value of the digitized luminance signal; (c) detecting an amount of black area in the digitized luminance signal and generating a weighting signal; (d) multiplying the data output from the memory by the weighting signal to obtain a product; and (e) multiplying the digitized luminance signal by a value

responsive to said product, thereby adjusting the black level of the digitized luminance signal, as in claim 7;

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tsuchiya, et al. Japanese Patent number JP360170377A discloses an automatic black level controlling.
